Geodetic Measurement Station

## Evolving Entry-Level Total Station

- Construction and Survey Application Software On Board
- Best-in-Class Measuring Distance Feature
- Reliable Large Volume Internal Memory
- Long-Hour Battery Operation
- Strong Environmental Specification against Tough Sites

# Construction and Survey Application Software On Board Reliable All-Round Total Station

## Construction

### Cross-Sectional Survey

By using the MLM (Missing Line Measurement) program, the height difference between points can be calculated for leveling. Also, you can save time on reflectorless mode to measure a number of points of variation in a large area.

### Stake Out

The Guide Light function will navigate the prism operator to move to the stake out line quickly so that stake out operation can be done effectively.

### Elevation Stake

Staking out with 3D coordinates, eliminates the need to set up TS on the straight line for all elevation stakes.

### Boundary and Cadastral Survey

By using the Area function, you can calculate the area easily. Also, you can determine the center point of a column such as an electric pole, which cannot be directly measured by using offset calculation.

### Coordinate Measurement

With coordinate measurement, you can manage 3D coordinate data so that various calculations such as Road, Layout and more can be determined. 3D coordinate data management can improve the productivity drastically.

### Topographic Survey

The trigger key, or measuring distance key, helps you perform topography quickly while continuously viewing through the telescope. Also, the long distance measuring range reduces the number of the instrument changes for more efficient working time.

## Survey

## Improve Topography and Stake Out with features to achieve faster and more efficient workflows

### Newly Designed High-End Class EDM

Especially effective in surveying control points that require high-accuracy, and in cross sectional surveying in large areas with reflectorless measurement mode.

#### All Features are at Top Class

|               | Accuracy   | Measuring Range |

### Reliable Large Volume Memory

Internal memory has 50,000 points to record. USB memory can be used up to 32GB.

## Superior Basic Feature will Expand Your Application

### Strong Environmental Spec

The IP66 rating ensures durability for most any rough job site temperatures and conditions.

### Long-life Battery

One battery (BDC70) lasts up to 28 hours, or about four days of normal operation time.

### Bright Illumination Key for Nighttime Work

Key buttons are illuminated to minimize mistakes.

## Topcon Provides Japan Quality Products

Topcon performs tough environmental tests to ensure long-term operation even under rough site environment.

GM Series total stations are thoroughly inspected with dust-proof and water-proof test chambers. In addition, various tests against vibration, drop, temperature, and humidity were successfully passed to achieve the best environmental spec. Also, the measuring distance accuracy test on base line and the instrument leveling and angle accuracy test and adjustment by collimator system ensure your satisfaction on the GM Series product quality.
